

ABSTRACT OF THE DISCLOSURE

1           A rear seat assembly of a passenger cabin of a pick-up truck  
2 includes a rear seat cushion and a rear seat back, each rotatable such that a  
3 bottom surface of the rotated rear seat back can rest upon a rear end of the  
4 rotated seat cushion to provide a storage space beneath the rotated seat back  
5 and between the rotated seat cushion and a rear wall of the passenger cabin.  
6 The cargo bed of the truck may be extended into the storage space by providing  
7 an access door thereto in a front wall of the cargo bed in communication with a  
8 corresponding opening in the rear wall of the passenger cabin.
